SUPPLIERS

¹Coast Southwest, Inc., ²The Innovation Company®, ³Tea Guys, ⁴Medolla Limited

PROPERTIES

pH: NA

Viscosity: NA

PROCEDURE

Phase A – Add Phase A to main vessel and mix evenly. **Phase B** – Add Phase B to main vessel and mix evenly. **Phase C** – Add Phase C to main vessel and mix until oil is evenly distributed. Powder will wet out and begin to bind together. Place in molds, compress, and allow to sit for 24 to 48 hours until rigid. Note: Oolong tea may be replaced with any micronized tea.
