	0.20%

## Suppliers

<sup>1</sup>Coast Southwest, Inc., <sup>2</sup>Ultra Chemical, Inc., <sup>3</sup>Vivimed Laboratories, <sup>4</sup>Medolla Italia, s.r.l.,

## Properties

pH: 6.50 (when in water)

Viscosity: NA

## Procedure

**Phase A** – Add Phase A to main vessel and mix evenly. **Phase B** – Add Phase B to main vessel and mix until uniform. **Phase C** – Add Phase C to main vessel and mix until uniform. **Phase D** – Add Phase D to main vessel and mix until uniform. Mixture will become wet. **Phase E** – Add Phase E to main vessel under same mixing.

Note: Batch will thicken slightly with this addition. Transfer to final container once uniform.
