---	------

Suppliers

¹Coast Southwest, Inc., ²Jojoba Desert (A.C.S. LTD), ³Kisolite Corp., ⁴International Cosmetic Science Centre (ICSC)

Properties

pH: N/A

Viscosity: N/A

Procedure

Phase A – In main vessel disperse Kisolite® *BMP* in Jojoba Oil. Once dispersed, add remaining Phase A ingredients with mixing. Begin heating to 70°C to 72°C. **Phase B** – Once Phase A is at desired temperature, add Phase B with shear mixing. Begin cool down. **Phase C** – When Phase AB reaches 65° C, add Phase C. Mix well and transfer to final container quickly. Let cool to room temperature.
