Surfactants

PROVIDING SERVICE COAST-TO-COAST

Coast Southwest serves customers from multiple locations across the country. We continue to expand our reach and offerings through a new, state-of-the-art facility and future headquarters in Irving, TX. Our commitment to growth is further emphasized through our expanding Midwest footprint.

EXTENSIVE CATALOG OF INGREDIENTS

Through consistent creation and discovery of breakthrough solutions, we continually add to our portfolio of ingredients, including nature-based alternatives that are better for your products and the environment.

NEW INGREDIENT TECHNOLOGY

Endinol® MILD B-SF65A

An easy-to-use isethionate surfactant system that is New York-compliant and contains no Prop 65 warnings. Achieve a rich foaming clean without drying out skin or damaging hair with this sulfate-free surfactant chemistry.

Novachem

Based in Argentina, Novachem develops biotechnological, natural, and sustainable active ingredients for skin and hair care applications. Science and the use of respectful practices create a positive impact for the planet.

GlyAcid®

High-purity, formaldehyde-free glycolic acid formulated specifically for the personal care industry.

Olivatis® Emulsifiers

High-performing emulsifiers derived from Olive Oil. These globally compliant, sustainable, and GMO-free emulsifiers are ideal for nonionic systems.

Kisolite® BMP

Revolutionary clay powder that provides an abundant source of micro- and macro-minerals, including Iron, Magnesium, Potassium, Phosphorous, Calcium, Silica, and Sodium.
